

**This year, fentanyl killed more Americans ages 18-45 than:**

- COVID 19
- CANCER
- SUICIDE
- CAR ACCIDENTS
- HEART DISEASE
- HOMICIDE

**FENTANYL IS A SYNTHETIC OPIOID THAT IS**

**50 X**

**STRONGER THAN HEROIN AND**

**100 X**

**STRONGER THAN MORPHINE**

**ILLICITLY MANUFACTURED FENTANYL**

Illicitly manufactured fentanyl (IMF) is available on the drug market in different forms, including liquid and powder. Fentanyl-laced drugs are extremely dangerous, and many people may be unaware that their drugs are laced with fentanyl.

Powdered fentanyl looks just like many other drugs. It is commonly mixed with drugs like heroin, cocaine, and methamphetamine and made into pills that are made to resemble other prescription opioids.

In its liquid form, IMF can be found in nasal sprays, eye drops, or dropped onto paper like small candies.

# SIGNS OF AN OVERDOSE

- small, constricted "pinpoint pupils"
- falling asleep or losing consciousness
- slow, weak or no breathing
- choking or gurgling sounds
- limp body
- cold, clammy, and/or discolored skin

# WHAT TO DO IF YOU THINK SOMEONE IS OVERDOSING

It may be hard to tell whether a person is high or experiencing an overdose. If you aren't sure, it's best to treat the situation like an overdose—you could save a life.

# 1

Call 9-1-1 immediately!

# 2

Administer Naloxone if available.

# 3

Try to keep the person awake and breathing.

# 4

Lay the person on their side to prevent choking

# 5

Stay with them until emergency workers arrive.

# Save a life...

...by preventing opioid overdose

# Who can? You can!
